#### **Experience**

# Microsoft via Artech Consulting, Redmond, WA Data Analyst – Risk Management

Jul 2015 - Present Aug 2019 - Present

- Developed Power BI dashboards from MS SQL databases that were critical in monitoring for noncompliant sales and internal API failures. The goal of the role is to increase compliance.
  - O Identified an API connection failure using a dashboard and was able to reduce API connection errors by 200% after leading collaboration with engineering teams.
- Implemented a data processing pipeline to merge sales data from 6 different tools. The business
  insights were used by leadership to increase sales and compliance in low volume countries
  associated with risk.
- Increased report efficiency by 97.5% by combining a Python script and Power Query automation to reduce development time per report from 40 hours per quarter to 1 hour per quarter.
  - O This script was also provided and instructed to peers to implement on their own to increase efficiency and compliance metrics across the organization.

### **Licensing Analyst Lead**

Nov 2018 - Aug 2019

- Directed team of analysts to consistent 1<sup>st</sup> place quantity/quality finishes within our company deal desk. Guidance was provided in the form of training, mentorship, and targeted learning for team members. Final placements of teams were a largely acclaimed achievement.
- Enabled that personal team of licensing analysts by teaching subject knowledge, encouraging growth, and providing quality assurance on 1200+ sales transactions per quarter.
- Delivered internal training to annually recurring new hire onboarding classes. These classes consisted of 10+ members each year.

#### **Senior Licensing Analyst**

Jul 2015 - Nov 2018

- Prepared 300+ pricing sheets per quarter that created Volume Licensing orders, frequently surpassing \$100M in deal value.
- Performed pricing analysis and review of proposals for the Volume Licensing division at Microsoft.
- Improved tools through User Acceptance Testing (UAT) with developers to identify problems and monitor development as part of change management.
